THERMOCHIMICA ACTA, VOLUME 163 (1990)

SUBJECT INDEX

Acoustic emission thermal analysis,
A study on the thermal decomposition of $KClO_4$ and $NaClO_4$ by acoustic emission thermal analysis 313

Adenosine triphosphate,
Binding and reaction calorimeters in Na, K ATPase–ATP system 97

Adiabatic calorimetry,
Some new aspects of adiabatic calorimetry at low temperatures 57

Adsorption,
Vibrational states and phase diagram of the submonolayer krypton adsorbed on graphite by the low temperature heat capacity 233

Alcohol solutions,
The conformational change of DNA in aqueous alcohol solutions containing metallic ions determined by using differential scanning calorimeter 147

Alcohols,
Effects of water and alcohols on molecular motion of perfluorinated ionomer membranes 161
On the relation between enthalpic virial coefficient and the size of alkyl group in dilute aqueous solution of alcohols 169

Alkyl groups,
On the relation between enthalpic virial coefficient and the size of alkyl group in dilute aqueous solution of alcohols 169

Alloys,
Thermochemical properties of some liquid III–V alloys 287

Anthracycline,
Interaction of an anthracycline antibiotic, 4′-O-tetrahydropyranyladriamycin (pyrarubicin), with plasmid pJL3–TB5 DNA 129

Antibiotics,
Interaction of an anthracycline antibiotic, 4′-O-tetrahydropyranyladriamycin (pyrarubicin), with plasmid pJL3–TB5 DNA 129

Azoxybenzene,
Thermal properties of nematic main-chain polyesters with azoxybenzene mesogen 211

Bilayers,
Melting of water absorbed by phospholipid bilayers: Effects of an unsaturated hydrocarbon chain 133

Binary mixtures,
Thermodynamics of liquid mixtures containing methyl methylthiomethyl sulfoxide. VII. Excess enhalpies of binary mixtures between methyl methylthiomethyl sulfoxide and each of toluene, *o*-, *m*-, *p*-xylenes and 1,3,5-trimethylbenzene at 298.15 K 183
Temperature dependence of molar excess volumes and excess thermal expansion coefficients for binary mixtures of cyclohexane with some hydrocarbons between 298.15 and 313.15 K 191

Binding,
Binding and reaction calorimeters in Na, K ATPase–ATP system 97

Biocalorimetry,
Recent developments in bio-calorimetry with micro-DSC 111

Bis(4-chlorophenyl)sulfone,
Thermodynamic study of the incommensurate phase transitions in crystalline bis(4-chlorophenyl)sulfone 241

Cells,
Application of calorimetric methods to cellular processes: with special references

to quantitative evaluation of drug action on living cells 71

Cellular processes,
Application of calorimetric methods to cellular processes: with special references to quantitative evaluation of drug action on living cells 71

Clathrates,
Thermal and dielectric properties of manganese squarate clathrate compound 225

Conformational change,
The conformational change of DNA in aqueous alcohol solutions containing metallic ions determined by using differential scanning calorimeter 147

Conformational transitions,
A differential scanning calorimetric study of the conformational transitions of several kinds of (1→6) branched (1→3)-β-D-glucans in a mixture of water and dimethylsulfoxide 89

Controlled transformation rate thermal analysis,
On the suitability of controlled transformation rate thermal analysis (CRTA) for kinetic study. 1. Determination of the activation energy by the rate–jump method 25

Cyclohexane,
Temperature dependence of molar excess volumes and excess thermal expansion coefficients for binary mixtures of cyclohexane with some hydrocarbons between 298.15 and 313.15 K 191

Decomposition,
Thermal decomposition of mixed zirconium and yttrium oxide hydrate 303
A study on the thermal decomposition of $KClO_4$ and $NaClO_4$ by acoustic emission thermal analysis 313

Dehydration,
Kinetics of nonisothermal dehydration of crushed crystals of potassium copper(II) chloride dihydrate 295

Diffusivity,
Thermal diffusivity measurement of polymer films by the temperature wave method using Joule-heating 317

Dihydrofolate reductase,
Thermal transition of a mutated dihydrofolate reductase 123

Dilution,
Heats of dilution of water-soluble-polymer solutions (II). Heat interaction parameters of aqueous hydroxypropylcellulose and gelatin solutions determined by means of flow microcalorimeter 155

Dimethylsulfoxide,
A differential scanning calorimetric study of the conformational transitions of several kinds of (1→6) branched (1→3)-β-D-glucans in a mixture of water and dimethylsulfoxide 89

DNA,
The conformational change of DNA in aqueous alcohol solutions containing metallic ions determined by using differential scanning calorimeter 147

Doping,
Heat capacity measurement of α-Ti–O solid solution doped with vanadium and aluminium from 320 to 910 K 279

Drug action,
Application of calorimetric methods to cellular processes: with special references to quantitative evaluation of drug action on living cells 71

Enthalpy relaxation,
Enthalpy relaxation of polyethers having phenylene groups in the main chain 175

Enzymes,
A stopped-flow calorimeter with a thermocouple array sensor for studies of energetic aspects of enzymatic reactions 105

Escherichia coli,
Scanning calorimetric study of tryptophan synthase α-subunits from *Escherichia coli*, *Salmonella typhimurium*, and an interspecies hybrid 117

Excess thermal expansion coefficient,

Temperature dependence of molar excess volumes and excess thermal expansion coefficients for binary mixtures of cyclohexane with some hydrocarbons between 298.15 and 313.15 K 191

Excess volume,
Temperature dependence of molar excess volumes and excess thermal expansion coefficients for binary mixtures of cyclohexane with some hydrocarbons between 298.15 and 313.15 K 191

Folding,
Thermodynamic studies of the insertion and folding of membrane proteins: Yeast cytochrome c oxidase 47

Freezing-in rate,
Pressure effect on relations between glass transition temperature and freezing-in rate for polystyrene 325

Gelatin,
Heats of dilution of water-soluble-polymer solutions (II). Heat interaction parameters of aqueous hydroxypropylcellulose and gelatin solutions determined by means of flow microcalorimeter 155

Glass-forming substances,
Construction of a heat capacity spectrometer and application to some molecular glass forming substances 219

Glass transition temperature,
Pressure effect on relations between glass transition temperature and freezing-in rate for polystyrene 325

Glucans,
A differential scanning calorimetric study of the conformational transitions of several kinds of (1→6) branched (1→3)-β-D-glucans in a mixture of water and dimethylsulfoxide 89

Graphite,
Vibrational states and phase diagram of the submonolayer krypton adsorbed on graphite by the low temperature heat capacity 233

Heat capacity,
Heat capacities of rare earth isothiocyanate heptahydrates, $[M(NCS)_3(H_2O)_6]\cdot H_2O$ (M = Ce, Pr, Nd), at very low temperatures: New finding of magnetic phase transitions and Schottky anomalies 249
Heat capacity and phase transition of trimethylolethane 263
Heat capacity measurement of α-Ti–O solid solution doped with vanadium and aluminium from 320 to 910 K 279

Heat capacity spectrometer,
Construction of a heat capacity spectrometer and application to some molecular glass forming substances 219

Heat content,
High temperature heat contents of III–V semiconductor systems 1

High sensitivity DSC,
Thermal characterization of a polyethyleneglycol-derivative induced vesicle fusion as revealed by high sensitivity differential scanning calorimetry 81

Hydrocarbons,
Temperature dependence of molar excess volumes and excess thermal expansion coefficients for binary mixtures of cyclohexane with some hydrocarbons between 298.15 and 313.15 K 191

Hydroxypropylcellulose,
Heats of dilution of water-soluble-polymer solutions (II). Heat interaction parameters of aqueous hydroxypropylcellulose and gelatin solutions determined by means of flow microcalorimeter 155

Insertion,
Thermodynamic studies of the insertion and folding of membrane proteins: Yeast cytochrome c oxidase 47

Isobaric specific heat,
Measurement of isobaric specific heat of HCFC-123 in the liquid phase 203

Joule-heating,
Thermal diffusivity measurement of polymer films by the temperature wave method using Joule-heating 317

Kinetics,
On the suitability of controlled transformation rate thermal analysis (CRTA) for kinetic study. 1. Determination of the activation energy by the rate–jump method 25
Krypton,
Vibrational states and phase diagram of the submonolayer krypton adsorbed on graphite by the low temperature heat capacity 233

Lithium formate,
The thermal phase transformations of lithium, sodium and potassium formates 271
Low temperatures,
Some new aspects of adiabatic calorimetry at low temperatures 57

Magnetic phase transitions,
Heat capacities of rare earth isothiocyanate heptahydrates, $[M(NCS)_3(H_2O)_6]\cdot H_2O$ (M = Ce, Pr, Nd), at very low temperatures: New finding of magnetic phase transitions and Schottky anomalies 249
Manganese squarate,
Thermal and dielectric properties of manganese squarate clathrate compound 225
Melting,
Calorimetry of phase transition and melting in silicates 13
Melting of water absorbed by phospholipid bilayers: Effects of an unsaturated hydrocarbon chain 133
Membranes,
Thermodynamic studies of the insertion and folding of membrane proteins: Yeast cytochrome c oxidase 47
Effects of water and alcohols on molecular motion of perfluorinated ionomer membranes 161
Metallic ions,
The conformational change of DNA in aqueous alcohol solutions containing metallic ions determined by using differential scanning calorimeter 147
Methyl methylthiomethyl sulfoxide,
Thermodynamics of liquid mixtures containing methyl methylthiomethyl sulfoxide. VII. Excess enhalpies of binary mixtures between methyl methylthiomethyl sulfoxide and each of toluene, *o*-, *m*-, *p*-xylenes and 1,3,5-trimethylbenzene at 298.15 K 183
Micro-DSC,
Recent developments in bio-calorimetry with micro-DSC 111
Molecular motion,
Effects of water and alcohols on molecular motion of perfluorinated ionomer membranes 161

Oxygen,
Heat capacity measurement of α-Ti–O solid solution doped with vanadium and aluminium from 320 to 910 K 279

Phase diagrams,
Vibrational states and phase diagram of the submonolayer krypton adsorbed on graphite by the low temperature heat capacity 233
Phase transformations,
The thermal phase transformations of lithium, sodium and potassium formates 271
Phase transitions,
Calorimetry of phase transition and melting in silicates 13
Thermodynamic study of the incommensurate phase transitions in crystalline bis(4-chlorophenyl)sulfone 241
Heat capacity and phase transition of trimethylolethane 263
Phenylene groups,
Enthalpy relaxation of polyethers having phenylene groups in the main chain 175
Phospholipids,
Melting of water absorbed by phospholipid bilayers: Effects of an unsaturated hydrocarbon chain 133
Plasmids,
Interaction of an anthracycline antibiotic, 4′-O-tetrahydropyranyladriamycin (pyrarubicin), with plasmid pJL3–TB5 DNA 129

Polyesters,
Thermal properties of nematic main-chain polyesters with azoxybenzene mesogen 211
Polyethers,
Enthalpy relaxation of polyethers having phenylene groups in the main chain 175
Polyethylene glycol,
Thermal characterization of a polyethyleneglycol-derivative induced vesicle fusion as revealed by high sensitivity differential scanning calorimetry 81
Polymers,
Heats of dilution of water-soluble-polymer solutions (II). Heat interaction parameters of aqueous hydroxypropylcellulose and gelatin solutions determined by means of flow microcalorimeter 155
Thermal diffusivity measurement of polymer films by the temperature wave method using Joule-heating 317
Polystyrene,
Pressure effect on relations between glass transition temperature and freezing-in rate for polystyrene 325
Potassium copper(II) chloride,
Kinetics of nonisothermal dehydration of crushed crystals of potassium copper(II) chloride dihydrate 295
Potassium cyanide,
Thermal and dielectric properties of the solid solutions $(RbCN)_{1-x}(KCN)_x$ at low temperatures 257
Potassium formate,
The thermal phase transformations of lithium, sodium and potassium formates 271
Potassium perchlorate,
A study on the thermal decomposition of $KClO_4$ and $NaClO_4$ by acoustic emission thermal analysis 313
Pressure effect,
Pressure effect on relations between glass transition temperature and freezing-in rate for polystyrene 325
Proteins,
Thermodynamic bases of the stability of protein structure 33
Thermodynamic studies of the insertion and folding of membrane proteins: Yeast cytochrome c oxidase 47

Rare earth isothiocyanates,
Heat capacities of rare earth isothiocyanate heptahydrates, $[M(NCS)_3(H_2O)_6]\cdot H_2O$ (M = Ce, Pr, Nd), at very low temperatures: New finding of magnetic phase transitions and Schottky anomalies 249
Reaction calorimeters,
Binding and reaction calorimeters in Na, K ATPase–ATP system 97
Reversed micelles,
Calorimetric studies on the state of water in aerosol OT reversed micelles 139
Rubidium cyanide,
Thermal and dielectric properties of the solid solutions $(RbCN)_{1-x}(KCN)_x$ at low temperatures 257

Salmonella typhimurium,
Scanning calorimetric study of tryptophan synthase α-subunits from *Escherichia coli*, *Salmonella typhimurium*, and an interspecies hybrid 117
Scanning calorimetry,
Scanning calorimetric study of tryptophan synthase α-subunits from *Escherichia coli*, *Salmonella typhimurium*, and an interspecies hybrid 117
Schottky anomalies,
Heat capacities of rare earth isothiocyanate heptahydrates, $[M(NCS)_3(H_2O)_6]\cdot H_2O$ (M = Ce, Pr, Nd), at very low temperatures: New finding of magnetic phase transitions and Schottky anomalies 249
Semiconductors,
High temperature heat contents of III–V semiconductor systems 1
Silicates,
Calorimetry of phase transition and melting in silicates 13
Sodium formate,
The thermal phase transformations of lithium, sodium and potassium formates 271
Sodium perchlorate,

A study on the thermal decomposition of $KClO_4$ and $NaClO_4$ by acoustic emission thermal analysis 313

Solid solutions,
Thermal and dielectric properties of the solid solutions $(RbCN)_{1-x}(KCN)_x$ at low temperatures 257
Heat capacity measurement of α-Ti–O solid solution doped with vanadium and aluminium from 320 to 910 K 279

Specific heat,
Measurement of isobaric specific heat of HCFC-123 in the liquid phase 203

Stability,
Thermodynamic bases of the stability of protein structure 33

Stopped-flow calorimeter,
A stopped-flow calorimeter with a thermocouple array sensor for studies of energetic aspects of enzymatic reactions 105

Structure,
Thermodynamic bases of the stability of protein structure 33

Temperature wave method,
Thermal diffusivity measurement of polymer films by the temperature wave method using Joule-heating 317

Thermocouples,
A stopped-flow calorimeter with a thermocouple array sensor for studies of energetic aspects of enzymatic reactions 105

Titanium,
Heat capacity measurement of α–Ti-O solid solution doped with vanadium and aluminium from 320 to 910 K 279

Toluene,
Thermodynamics of liquid mixtures containing methyl methylthiomethyl sulfoxide. VII. Excess enhalpies of binary mixtures between methyl methylthiomethyl sulfoxide and each of toluene, *o*-, *m*-, *p*-xylenes and 1,3,5-trimethylbenzene at 298.15 K 183

Transitions,
Thermal transition of a mutated dihydrofolate reductase 123

Trimethylbenzene,
Thermodynamics of liquid mixtures containing methyl methylthiomethyl sulfoxide. VII. Excess enhalpies of binary mixtures between methyl methylthiomethyl sulfoxide and each of toluene, *o*-, *m*-, *p*-xylenes and 1,3,5-trimethylbenzene at 298.15 K 183

Trimethylolethane,
Heat capacity and phase transition of trimethylolethane 263

Tryptophan,
Scanning calorimetric study of tryptophan synthase α-subunits from *Escherichia coli*, *Salmonella typhimurium*, and an interspecies hybrid 117

Vesicle fusion,
Thermal characterization of a polyethyleneglycol-derivative induced vesicle fusion as revealed by high sensitivity differential scanning calorimetry 81

Vibrational states,
Vibrational states and phase diagram of the submonolayer krypton adsorbed on graphite by the low temperature heat capacity 233

Virial coefficient,
On the relation between enthalpic virial coefficient and the size of alkyl group in dilute aqueous solution of alcohols 169

Water,
A differential scanning calorimetric study of the conformational transitions of several kinds of (1→6) branched (1→3)-β-D-glucans in a mixture of water and dimethylsulfoxide 89
Melting of water absorbed by phospholipid bilayers: Effects of an unsaturated hydrocarbon chain 133
Calorimetric studies on the state of water in aerosol OT reversed micelles 139
Effects of water and alcohols on molecular motion of perfluorinated ionomer membranes 161

Xylene,
Thermodynamics of liquid mixtures containing methyl methylthiomethyl sulfoxide. VII. Excess enhalpies of binary mixtures between methyl methylthiomethyl sulfoxide and each of toluene, *o*-, *m*-, *p*-xylenes and 1,3,5-trimethylbenzene at 298.15 K 183

Yeast,
Thermodynamic studies of the insertion and folding of membrane proteins: Yeast cytochrome c oxidase 47

Yttrium oxide,
Thermal decomposition of mixed zirconium and yttrium oxide hydrate 303

Zirconium oxide,
Thermal decomposition of mixed zirconium and yttrium oxide hydrate 303
